HPZenner Clinical

The HPZenner® Clinical GmbH&CoKG is a Clinical Research Organization with a focus to the Clinical Evaluation and Clinical Investigation of Medical Devices. The company is the result of Hans P. Zenner's own development, clinical evaluation and clinical testing of medical devices and drugs since 1986. It is also based on his knowledge and experience of medical handling of medical devices and drugs during his clinical work as well as his position as Chairman of the Ethics Committee of a University Hospital for the evaluation of studies with medical devices. Business activities include legally compliant clinical evaluations and clinical studies (if necessary in an own Study Unit in Tübingen) by medical board certified specialists, e.g. clinical evaluations according to MDR, clinical trials according to EN ISO 14155/ MPG/ MPKPV or clinical post market surveillance according to EU-MDR Annex XIV. For the performance of Clinical Trials the HPZenner Clinical has access to a network of leading Physicians and Surgeons predominantly in Europe and but also in the US.

Expertise

Clinical studies since 1986

Medical device development since 1988, 90 patents (drugs & medical devices)

Medical device evaluations since 1996

Since then more than 1500 consultancies/assessments/evaluations for over 500 clients in Europe
